

| Maths Progression of skills and knowledge |  |  |  | Number: addition and subtraction |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reception | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| Number - addition and subtraction <br> Pupils should be taught to: <br> - automatically recall <br> (without reference to rhymes, counting or other aids) number bonds to 5 (including subtraction facts) and some number bonds to 10, including double facts <br> - explore and represent patterns within numbers to 10 , including evens and odds, double facts and how quantities can be distributed evenly | Number - addition and subtraction <br> Pupils should be taught to: <br> read, write and <br> interpret <br> mathematical <br> statements <br> involving addition <br> (+), subtraction (-) <br> and equals (=) signs <br> represent and use <br> number bonds and <br> related subtraction <br> facts within 20 <br> add and subtract <br> one-digit and two- <br> digit numbers to <br> 20 , including zero <br> solve one-step <br> problems that <br> involve addition <br> and subtraction, <br> using concrete <br> objects and <br> pictorial <br> representations, and missing number problems such as $7=-9$. | Number - addition and subtraction <br> Pupils should be taught to: <br> solve problems <br> with addition and <br> subtraction: <br> - using concrete <br> objects and <br> pictorial <br> representations, <br> including those <br> involving numbers, <br> quantities and <br> measures <br> - applying their <br> increasing <br> knowledge of mental and written methods <br> - recall and use <br> addition and <br> subtraction facts to <br> 20 fluently, and derive and use related facts up to 100 <br> - add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <br> - a two-digit number and ones | Number - addition and subtraction <br> Pupils should be taught to: <br> add and subtract <br> numbers mentally, <br> including: <br> - a three-digit <br> number and ones <br> - a three-digit <br> number and tens <br> - a three-digit <br> number and <br> hundreds <br> - add and subtract <br> numbers with up to <br> three digits, using <br> formal written <br> methods of columnar addition and subtraction <br> - estimate the answer to a calculation and use inverse operations to check answers <br> - solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. | Number - addition and subtraction <br> Pupils should be taught to: <br> add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate <br> - estimate and use inverse operations to check answers to a calculation <br> solve addition and subtraction twostep problems in contexts, deciding which operations and methods to use and why | Number - addition and subtraction <br> Pupils should be taught to: <br> add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) <br> - add and subtract numbers mentally with increasingly large numbers <br> - use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy <br> - solve addition and subtraction multistep problems in contexts, deciding which operations and methods to use and why. | Number - addition and subtraction <br> Pupils should be taught to: <br> perform mental <br> calculations, <br> including with <br> mixed operations <br> and large numbers <br> use their <br> knowledge of the <br> order of operations <br> to carry out <br> calculations <br> involving the four operations <br> - solve addition and subtraction multistep problems in contexts, deciding which operations and methods to use and why |

|  |  | - a two-digit number and tens two two-digit numbers adding three onedigit numbers show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot <br> - recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Maths Progression of skills and knowledge |  |  |  | Number: fractions |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reception | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| Number multiplication and division <br> Pupils should be taught to: <br> N/A | Number multiplication and division <br> Pupils should be taught to: <br> - recognise, find and name a half as one of two equal parts of an object, shape or quantity <br> - recognise, find and name a quarter as one of four equal parts of an object, shape or quantity. | Number multiplication and division <br> Pupils should be taught to: <br> - recognise, find, name and write fractions $1 / 3,1 / 4$, $2 / 4$ and $3 / 4$ of a length, shape, set of objects or quantity <br> - write simple fractions for example, $1 / 2$ of $6=3$ and recognise the equivalence of $2 / 4$ and $1 / 2$. | Number multiplication and division <br> Pupils should be taught to: <br> count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10 recognise, find and write fractions of a discrete set of objects: unit fractions and nonunit fractions with small denominators <br> - recognise and use fractions as numbers: unit fractions and nonunit fractions with small denominators <br> - recognise and show, using diagrams, equivalent fractions with small denominators <br> - add and subtract fractions with the same denominator within one whole | Number - <br> multiplication and <br> division (including decimals) <br> Pupils should be taught to: <br> recognise and show, using diagrams, families of common equivalent fractions count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten. <br> solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number <br> - add and subtract fractions with the same denominator <br> - recognise and write decimal equivalents | Number multiplication and division (including decimals and percentages) <br> Pupils should be taught to: <br> compare and order fractions whose denominators are all multiples of the same number identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths <br> - recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, $2 / 5+4 / 5$ = 6/5= $11 / 5$ ] <br> add and subtract fractions with the same denominator and denominators that are multiples | Number multiplication and division (including decimals and percentages) <br> Pupils should be taught to: <br> use common <br> factors to simplify <br> fractions; use <br> common multiples <br> to express fractions <br> in the same <br> denomination <br> - compare and order <br> fractions, including <br> fractions $>1$ <br> - add and subtract <br> fractions with <br> different <br> denominators and <br> mixed numbers, <br> using the concept <br> of equivalent <br> fractions <br> - multiply simple <br> pairs of proper <br> fractions, writing <br> the answer in its <br> simplest form [for <br> example, $1 / 4 \times 1 / 2=$ <br> 1/8] <br> - divide proper <br> fractions by whole <br> numbers [for <br> example, $1 / 3 \div 2=$ <br> 1/6] |

| Maths Progression of skills and knowledge |  |  |  | Measurement |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reception | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| Measurement <br> Pupils should be taught to: <br> - compare length, weight and capacity | Measurement <br> Pupils should be taught to: <br> - compare, describe and solve practical problems for: <br> - lengths and heights [for example, long/short, longer/shorter, tall/short, double/half] <br> - mass/weight [for example, heavy/light, heavier than, lighter than] <br> - capacity and volume [for example, full/empty, more than, less than, half, half full, quarter] <br> - time [for example, quicker, slower, earlier, later] <br> - measure and begin to record the following: <br> - lengths and heights <br> - mass/weight <br> - capacity and volume <br> - time (hours, minutes, seconds) <br> - recognise and know the value of | Measuremen | Measurement | Measurement | Measurement | Measurement |
|  |  | Pupils should be taught to: | Pupils should be taught to: | Pupils should be taught to: | Pupils should be taught to: | Pupils should be taught to: |
|  |  | choose and use | - measure, compare, | Convert between | convert between | - solve problems |
|  |  | appropriate standard units to | add and subtract: <br> lengths | different units of measure [for | different units of metric measure (for | involving the calculation and |
|  |  | estimate and | (m/cm/mm); mass | example, kilometre | example, kilometre | conversion of units |
|  |  | measure | ( $\mathrm{kg} / \mathrm{g}$ ); | to metre; hour to | and metre; | of measure, using |
|  |  | length/height in | volume/capacity | minute] | centimetre and | decimal notation |
|  |  | any direction | $(1 / \mathrm{ml})$ | measure and | metre; centimetre | up to three decimal |
|  |  | (m/cm); mass | measure the | calculate the | and millimetre; | places where |
|  |  | $(\mathrm{kg} / \mathrm{g})$; temperature | perimeter of simple | perimeter of a | gram and kilogram; | appropriate |
|  |  | ( ${ }^{\circ} \mathrm{C}$ ); capacity (litres/ml) to the | 2-D shapes <br> add and subtract | rectilinear figure (including squares) | litre and millilitre) - understand and use | use, read, write and convert between |
|  |  | nearest | amounts of money | in centimetres and | approximate | standard units, |
|  |  | appropriate unit, | to give change, | metres | equivalences | converting |
|  |  | using rulers, scales, | using both $£$ and $p$ | - find the area of | between metric | measurements of |
|  |  | thermometers and | in practical | rectilinear shapes | units and common | length, mass, |
|  |  | measuring vessels | contexts | by counting | imperial units such | volume and time |
|  |  | compare and order | tell and write the | squares | as inches, pounds | from a smaller unit |
|  |  | lengths, mass, | time from an | estimate, compare | and pints | of measure to a |
|  |  | volume/capacity | analogue clock, | and calculate | - measure and | larger unit, and vice |
|  |  | and record the | including using | different measures, | calculate the | versa, using |
|  |  | results using >, < | Roman numerals | including money in | perimeter of | decimal notation to |
|  |  | and = | from I to XII, and | pounds and pence | composite | up to three decimal |
|  |  | recognise and use | 12-hour and 24- | read, write and | rectilinear shapes | places |
|  |  | symbols for pounds | hour clocks | convert time | in centimetres and | convert between |
|  |  | $(\mathrm{f})$ and pence (p); | estimate and read | between analogue | metres | miles and |
|  |  | combine amounts | time with | and digital 12- and | calculate and | kilometres |
|  |  | to make a | increasing accuracy | 24-hour clocks | compare the area | recognise that |
|  |  | particular value | to the nearest | - solve problems | of rectangles | shapes with the |
|  |  | find different | minute; record and | involving | (including squares), | same areas can |
|  |  | combinations of | compare time in | converting from | and including using | have different |
|  |  | coins that equal the | terms of seconds, | hours to minutes; | standard units, | perimeters and vice |
|  |  | same amounts of | minutes and hours; | minutes to | square centimetres | versa |
|  |  |  | use vocabulary |  | (cm2) and square | - recognise when it is |
|  |  |  | such as o'clock, |  |  | possible to use |

| Progression of skills and knowledge |  |  |  | Geometry: properties of shapes |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reception | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| Geometry: properties of shapes <br> Pupils should be taught to: <br> - talk about 2D and 3D shapes <br> - select, rotate and manipulate shapes in order to develop spatial reasoning skills <br> - compose and decompose shapes so that children can recognise a shape can have other shapes within it, just as numbers can | Geometry: properties of shapes <br> Pupils should be taught to: <br> - recognise and name common 2-D and $3-\mathrm{D}$ shapes, including: <br> - 2-D shapes [for example, rectangles (including squares), circles and triangles] <br> - 3-D shapes [for example, cuboids (including cubes), pyramids and spheres] | Geometry: properties of shapes <br> Pupils should be taught to: <br> - identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line <br> - identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces <br> - identify 2-D shapes on the surface of 3D shapes, [for example, a circle on a cylinder and a triangle on a pyramid] <br> - compare and sort common 2-D and 3$D$ shapes and everyday objects | Geometry: properties of shapes <br> Pupils should be taught to: <br> draw 2-D shapes <br> and make 3-D <br> shapes using <br> modelling <br> materials; <br> recognise 3-D <br> shapes in different <br> orientations and <br> describe them <br> recognise angles as <br> a property of shape <br> or a description of <br> a turn <br> identify right angles, recognise that two right angles make a halfturn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle <br> - identify horizontal and vertical lines and pairs of perpendicular and parallel lines. | Geometry: properties of shapes <br> Pupils should be taught to: <br> - compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes <br> - identify acute and obtuse angles and compare and order angles up to two right angles by size <br> - identify lines of symmetry in 2-D shapes presented in different orientations <br> - complete a simple symmetric figure with respect to a specific line of symmetry. | Geometry: properties of shapes <br> Pupils should be taught to: <br> identify 3-D shapes, including cubes and other cuboids, from 2-D representations <br> - know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles draw given angles, and measure them in degrees ( ${ }^{\circ}$ ) angles at a point and one whole turn (total $360^{\circ}$ ) <br> - angles at a point on a straight line and 2 1 a turn (total $180^{\circ}$ ) other multiples of $90^{\circ}$ <br> use the properties of rectangles to deduce related facts and find missing lengths and angles distinguish between regular and irregular polygons based on reasoning about | Geometry: properties of shapes <br> Pupils should be taught to: <br> - draw 2-D shapes <br> using given <br> dimensions and angles <br> - recognise, describe and build simple 3- <br> D shapes, including making nets <br> - compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons <br> - illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius <br> - recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles. |

| Maths Progression of skills and knowledge |  |  |  | Geometry: position and direction |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reception | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
| Geometry: position and direction <br> Pupils should be taught to: <br> understand position through words alone 'under' 'in front of' and 'behind' draw information from a simple map continue, copy and create repeating patterns | Geometry: position and direction <br> Pupils should be taught to: <br> - describe position, direction and movement, including whole, half, quarter and three quarter turns. | Geometry: position and direction <br> Pupils should be taught to: <br> - order and arrange <br> combinations of mathematical objects in patterns and sequences <br> - use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and threequarter turns (clockwise and anticlockwise). | Geometry: position and direction <br> Pupils should be taught to: <br> N/A | Geometry: position and direction <br> Pupils should be taught to: <br> describe positions on a 2-D grid as coordinates in the first quadrant describe movements between positions as translations of a given unit to the left/right and up/down plot specified points and draw sides to complete a given polygon. | Geometry: position and direction <br> Pupils should be taught to: <br> - identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed. | Geometry: position and direction <br> Pupils should be taught to: <br> describe positions on the full coordinate grid (all four quadrants) <br> - draw and translate simple shapes on the coordinate plane, and reflect them in the axes. |

| Progression of skills and knowledge |  |  |  | Statistics |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reception | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
|  |  |  |  |  |  |  |
| Pupils should be taught to: N/A | Pupils should be taught to: N/A | Pupils should be taught to: <br> interpret and construct simple pictograms, tally charts, block diagrams and simple tables <br> - ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity <br> - ask and answer questions about totalling and comparing categorical data. | Pupils should be taught to: <br> interpret and present data using bar charts, pictograms and tables <br> - solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?’] using information presented in scaled bar charts and pictograms and tables. | Pupils should be taught to: <br> interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs. <br> - solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs. | Pupils should be taught to: <br> solve comparison, sum and difference problems using information presented in a line graph <br> - complete, read and interpret information in tables, including timetables. | Pupils should be taught to: <br> interpret and construct pie charts and line graphs and use these to solve problems <br> - calculate and interpret the mean as an average. |
